

# Sponsorship Opportunities

K-State Advancing Learning & Teaching in Computer Science (ALT+CS) Lab is proud to host the 2nd Computer Science for Kansas (CS4KS) Educator Conference May 28-31st. This conference is a four-day professional development opportunity for Kansas K-12 teachers. Designed for educators at all levels of experience in computer science education, CS4KS brings together educators to explore best practices, emerging trends, and hands-on strategies for teaching computer science. The conference features interactive sessions, educator-led presentations, and networking opportunities that support skill-building and inspire new ideas for the classroom. Participants leave with practical strategies and renewed motivation to advance computer science education in their local communities.

Your support helps keep this conference affordable and accessible to Kansas teachers and schools, especially in rural and underserved regions of the state. Last year we had more than 50 teachers participate, and we anticipate higher numbers this year. **We ask that you pledge your support by April 28th.**

## Tiers of Support
